DETAILED ACTION

1. Claims 1-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Schroeder et al (6,224,714).

Schroeder et al shows the claimed polymer as a strength agent for absorbent tissue paper, see especially columns 13 and 14.

2. Claims 14-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroeder et al (6,224,714).

Schroeder et al apparently is silent as to the basis weight and the addition rate. The claimed basis weight is well known and standard for tissue paper and the amount added would have been obvious based on the desired strength improvement of the tissue product.

3. Figure 1 of the drawings is objected to because the hand lettering of reference numbers in Figure 1 is very poor. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
